

Capstone Research Topics:

Nurse Practitioner

1. Prevention of patient falls
2. Use of honey based products for wound care
3. Wound care using silver dressings
4. Exercise as a method to alleviate depression
5. Outcomes from breastfeeding vs. bottle feeding
6. Calming an aggressive patient
7. Opioid prescription risks
8. Improving geriatric training within nurse practitioner programs
9. Improving data collection techniques and analysis for nurse practitioners
10. Treating and assessing acute pain
11. Campus based clinics for STI diagnosis
12. Improving lung cancer screening
13. How to identify patients for end of life care
14. Improvements to body mass index screening
15. Reducing distress in adult outpatients
16. Screening for depression in adolescents
17. Prevention of antibiotic over-prescription
18. Improving adherence to medication rates
19. Improving asthma treatment in the care home
20. Sleep apnea screening for heart health
