Clar et al. (2004) reviewed a further conducted study in 2001 by the AAN et al.  A CM Communications, 4(7): 5-11. This paper looks into the details between intimacy and instant messaging. Computer Mediated Communication (CMC) is now commonly used in personal and professional communications. This is due to the increased use and availability of computer devices such as laptops, tablets, and smartphones. However, previous studies have shown that the use of CMC can have an impact on offline relationships. This study aims to understand how online and offline relationships are being impacted differently and how it influences both online and offline relationships. The Different Meanings of Online Communication and Their Impact on Relationships

The Different Meanings of Online Communication

Clar et al. (2004) conducted a study to examine the impact of internet and non-internet relationships mediated by CMC, all types need to be studied. This project further looks into Clar et al.'s research in contrast to other research in proposing additional impact by CMC, all types need to be studied so as to completely understand how it influences both online and offline relationships. The Different Meanings of Online Communication and Their Impact on Relationships

Clar et al. (2004) reviewed a further conducted study in 2001 by the AAN et al. The main relationships. Change in Behavior, 22(4), 12-23.

In conclusion, Clarke and Finley (2006) note that CMC is not a substitute for face-to-face communication, as it becomes less effective when it comes to creating feelings of intimacy or closeness, while there are also other studies that suggest otherwise. In order to understand how online and offline relationships are being impacted differently and how it influences both online and offline relationships, it is necessary to carry out comprehensive longitudinal studies, as well as to develop new methodologies that take into account the unique characteristics of online communication. Overall, this project will contribute to our understanding of how CMC can impact the quality and nature of relationships, and provide valuable insights for future research and practice.
